Preventive Maintenance Program
Minimize Unplanned Downtime

This program offers a fixed cost preventive maintenance schedule that’s designed to reduce both compressor downtime and the cost of repair.

MECHANICAL PERFORMANCE

- Instrumentation Function and Calibration
- Control Panel Tuning
- Vibration Functioning and Readouts
- Lube Oil System Inspection and Oil Analysis
- Inlet Air System Inspection
- Seal Air Inspection
- Coolers / Cooling Water System Inspection
- Condensate Removal System Inspection

COMPRESSOR PERFORMANCE

- Inspect Overall Health of Compressor With Performance Surge
- Establishment of Benchmarks and Trending
- Inspect Individual Stage Performance By Calculating and Analyzing Pressure Ratios

OPTIONAL SERVICES AVAILABLE UPON REQUEST

- Laser Alignment (Additional Charges Apply For These Services)
- Vibration Analysis

*Program pricing is based on one (1) eight (8) hour day per compressor. In the event that more than eight (8) hours per day is required to complete the service per compressor, additional time will be charged per our standard service rates. Consumable replacement parts, such as filter elements are not included in the fixed price. Price is for contingent U.S. only. Other locations priced upon request. Air Relief, Inc. is in no way affiliated with Ingersoll-Rand®, Cooper Turbo®, Elliot®. Atlas-Copco®, Clark®, or Worthington®.
